RULES OF THE CATHOLIC CEMETERIES of the Archdiocese of St. Louis

PREAMBLE

The chief responsibility of the Board of Trustees of the Catholic Cemeteries of the Archdiocese of St. Louis is to direct the management of the Catholic Cemeteries to provide the people with places of burial that are representative of the Church's reverence for the remains of the faithful departed and its hope in the resurrection. Its goals are both spiritual and temporal. The spiritual goals are that the Catholic cemetery be a place of comfort on the day of a funeral and the years that follow. To do so the cemeteries are to be conducive to the funeral liturgy and its personnel helpful in providing sound counsel in the selection of a family plot responsive to family needs and its vision of itself.

We bury our dear ones with love. A love that the Church and cemetery personnel share with each family that uses its burial facilities. Love is not for the moment, for we believe that the dead shall rise again on the Last Day to be reunited with their loved ones. Love reaches far into the future expressing itself in caring for the place of burial and the beauty of the surrounding cemetery grounds. Love is not narrow or exclusive for one's own, but embracing all who lay in the hallowed ground shared by their family. The Catholic cemetery is a place of love by the Church, the Mystical Body of Christ for all of its members, the living and the dead.

The temporal concerns are to make the spiritual goals possible by sound management, which require that a fair wage be paid to the men and women who make everything happen in the cemetery and that up-to-date horticulture principles and the best interment facilities and techniques available be adopted. Since the Church's love is widely defined as to time and place, old burial grounds must be looked after and new facilities developed as the population shifts and grows.

The Board of Trustees was organized in 1860 at the direction of Archbishop Peter Richard Kenrick establishing the Endowed Care Fund at that time. The interest earned on the investment of the Endowed Care Fund principal provides an essential third of the cemetery's operating income.

The Mercy of God flows through His Church to His people.

GENERAL PURPOSE

The purpose of the rules of the Catholic Cemeteries of the Archdiocese of St. Louis is to promote the ideals of Christian burial by making the cemetery grounds a haven of comfort and peace, the continued welfare of the cemetery as a whole and the well-being of lot holders and visitors. The rules are not arbitrary, but developed over decades of experience of what promotes the common good.

ENDOWED CARE FUND OF THE CATHOLIC CEMETERIES OF THE ARCHDIOCESE OF ST. LOUIS

The beauty and care of the cemetery, present and future, is entirely dependent upon the Endowed Care Fund. The cemetery has three sources of income: the sale of lots, crypts and niches, interment fees and income earned by the Endowed Care Fund. As the individual cemeteries grow older the sale of lots, crypts and niches fall off, as do interments, leaving the burden of caring for the burial grounds and cemetery infrastructure more and more dependent upon income generated by the Endowed Care Fund investments.

The Board of Trustees established the Endowed Care Fund in 1860. For over 55 years a portion of every lot or crypt sale has been dedicated to the Endowed Care Fund. An actuarial study of future cemetery needs found that less than a third of all burial property sold has an endowment. Hundreds of thousands of graves are being maintained at the expense of those who have made a donation either on an existing family lot or as a part of the price of a newly purchased lot. The guiding principle of the cemeteries rules is that each of the burial grounds that make up the Catholic Cemeteries of the Archdiocese of St. Louis always be maintained as befits the reliquary of the saints. The Endowed Care Fund is, therefore, key to our thinking and regulations. For the owners of the older, unendowed lots, the graves of long ago are those of your relatives and are your responsibility.

- 44. Inlays may be used only with consent of the cemetery management, but with no liability to the cemetery for any damages whatsoever.
 - A. Ceramic photographs on memorials do not conform to cemetery practice, lend themselves to vandalism and to unfavorable comment. Express permission of the cemetery office must be obtained before they may be installed. The cemetery shall not be liable in any instance for damage to inlaid or attached material on memorials.
 - B. A letter signed by the purchaser is to be on file with the cemetery that full responsibility for the inlay or photograph on the memorial lies with the family.
 - C. Shared monuments are to be treated as family monuments in regards to lettering and photographs.
- 45. Lettering should be of design and size appropriate to the stone in question.

MATERIALS

48. Materials used in the manufacture of memorial work should be selected with concern for durability. Icy weather, the heat of the sun and effects of air pollution all contribute to the deterioration of stonework.
- A. Granite is the most durable material and is recommended.
 - B. Hard, dense marble may be used.
 - C. Bronze or bronze and granite markers may be used.
 - D. Other materials are not approved.

NB Grouting must be either the monumental setting compound commonly used by the industry in St. Louis or an epoxy material. All joints are to have a perfect seal against moisture.

Conditions:

It is the responsibility of the lot holder that all memorial work be maintained in a solid, non-hazardous condition. Any damage resulting from a misalignment or loose condition of a memorial is the liability of the lot holder. Stones are moved by the natural action of frost and weather. The family should inspect them from time to time.

RULES FOR FLOWERS AND PLANTING

The following rules are designed to maintain the appearance of the cemetery and to make your visits more pleasant.

1. Effective January 1, 2005 — No more than two decorations per grave. The cemetery reserves the right to remove and discard any excess for the overall maintenance and appearance of the cemetery.
2. The planting of shrubs and flowers is carefully planned for the general appearance of the cemetery. Planting is not permitted on private lots.
3. Natural cut flowers are suggested.
4. Please do not bring glass, ceramic or metal holders as they are hazardous for the workmen and visitors.
5. The cemetery does not approve of permanent metal flower vases, nor will it accept any liability for their loss or damage under any circumstances. It is the responsibility of the lot holder to return the vases to their holder so that they will not damage the cemetery equipment.

- A. **Due to the nature of vases the cemetery is not liable for theft or damage under any circumstances whatsoever.**
 - B. Permanent metal flower vases were no longer permitted as of December 1, 1988.
6. Potted plants, votive lights, solar lights, balloons and other unsightly grave decorations are not appropriate in a cemetery.
- A. Please be aware of the sensitivities of others when decorating the grave of a loved one.
 - B. Materials used should have a religious motif in keeping with the sacred nature of the cemetery.
7. A Christmas wreath or grave covering of natural materials is permitted on a lot from Thanksgiving Day until the last week of January. Refer to annual decoration removal schedule for exact dates.
8. Flowers and **all** grave decorations will be picked up periodically by cemetery personnel. Annual decoration removal schedules are provided.
9. Foam plastic packaging is not biologically degradable and is a soil pollutant that hampers the growth of grass and other plants. Please do not bring it into the cemetery.
10. **The cemetery is not responsible for lost, damaged or stolen grave decorations. The removal of flowers, planting or other property without proper authorization is theft and will be prosecuted.**
11. The quantity and disposition of funeral flowers on new graves is to be determined by the cemetery. They will only remain for one weekend after the interment as they become faded and unsightly. Display in a heated parlor drastically shortens the life of cut flowers.
12. **Planting material on a lot is not covered by endowed care and remains the responsibility of the lot holder.**

SPECIAL RULES REGARDING FLORAL GARDEN LAWN CRYPTS

This innovative idea combines a flower garden with a lawn crypt for two entombments and a monument of your choice. Families are encouraged to select low growing plants, seasonal or perennial, and maintain them throughout the years. When this ceases, the cemetery will install and maintain ground cover. It is important not to encroach on the nearby crypts of others. The monument may be installed at any time after the lawn crypt is paid for in full and may be a maximum height of 30", a maximum length of 30", monolithic in design of a width between 8" and 10". They must be pinned to the concrete foundation, as bases are not permitted.
